DAYMAARK

How to use it

A walk-through in plain words. Read it out loud if you want. One step at a time.

App: https://daymark-eosin-five.vercel.app
Press Ctrl+Shift+R once so you are not on an old page.

What this app is

A school uses Daymaark to see what happened today.

The office runs the school. The teacher marks who came, and writes what was taught. The parent sees that same day on their phone. A test the class sat becomes a mark on one sheet. That sheet is the term card.

If fees are not paid, the parent cannot open the term card. That is on purpose.

Daymaark does not do hostel, bus, library, pay, or bulk SMS.

Two ways to show it

1. Start a new school from nothing. Use this if you want to show setup.
2. Use Greenfield Academy. Use this if you already pasted APPLY_RUN19.sql. Same app. Greenfield is already full of children, lessons, and a test.

Greenfield password for every login

DaymaarkDemo2026

proprietor.demo@daymaark.app	**office boss /admin**
admin.demo@daymaark.app	**office /admin**
teacher.demo@daymaark.app	**teacher /teacher**
parent.demo@daymaark.app	**Adaeze's mum /parent**
student.demo@daymaark.app	**Adaeze /student**

Apply form: /apply/greenfield-demo

Sit a test: /sit/greenfield-maths-ca

Parent code: ADAEZE01

> Sign out when you change person.

Part 1 - Start a school

Do this on a new account. Skip this part if you are using Greenfield.

1. Open the app.
2. Tap Create account.

3. Type your name, email, and a password.
4. If it asks you to open an email, open it.
5. You land on a welcome page.
6. Tap I run a school.
7. Type the school name.
8. Type your name.
9. Add a crest if you have one. This picture becomes the school on every page and every print. You can add it later under Account.
10. Tap create.
11. You are now the proprietor. You own the school. You land on Today.

Do these four jobs, in this order. Today shows you which ones are still open.

Job 1. People

Tap People. Invite an admin. They run the day. You still own the school. Invite a teacher when you are ready.

Job 2. Set the term

Tap Set term. Example: First Term 2026/2027. Put start date and end date. The register and the term card use this term.

Job 3. Classes

Tap Classes. Tap New class. Name it the way the school does. Example: JSS 1A.

Job 4. Children

Open the class. Tap Add. Paste a list of names, or type them. Put admission numbers if the school has them.

On each child you can:

- Code - Makes a short code. Give it to the parent. The parent types that code to see their child.
- Codes - Makes a code for every child in the class at once.
- Login - Invite the child's own email, if the child will sit a test with their own sign-in.
- Photo - Put the child's picture. It prints on the ID.
- Fees - Mark the child as paid, or fees due.
- Assign - Put a teacher on this class. Form teacher, or by subject.

Also before a visitor walks in:

- Account - Address and phone. They print on the back of the ID card.
- Fees - Set what the class pays this term, in instalments.
- Apply - People who want a place fill /apply/ then the school name slug. Their form lands here. Enrol puts the child on the class list.

Part 2 - The teacher in the morning

Sign in as the teacher. You land on Register.

1. Pick the class if you teach more than one.
2. Tap All present.
3. Change the two or three who are not present.

P	**present**
L	**late**
A	**absent**
E	**excused**

4. Tap a name if you want one short note. Example: Came after assembly. The parent sees this note. Keep it to one line.
5. It saves by itself. If the phone has no network, it waits and sends later.

Then tap Lesson.

1. Pick the class and the subject.
2. Type the topic.
3. Type a short summary of what you taught.
4. Type homework if there is any, and when it is due.
5. Save.

> One subject, one day, one form. That is all. Timetable is the week. Notices is a note to the class.

Part 3 - The office today

Sign in as proprietor or admin. You land on Today.

Today shows how many children, who marked the register, who posted a lesson, who is falling behind, and whose birthday is near.

The list on the side

Today	
Register	**you can mark it too**
Lesson	**same form as the teacher**
Timetable	
Flagged	**children whose attendance is falling**
Bank	**questions for tests**
CBT	**the papers**
Marking	**mark and approve**
Classes	**children, codes, IDs, reports**
People	**staff**
Fees	**what to pay, and remind one parent**
Apply	**people asking for a place**
Notices	**a note to the school, a class, parents, or staff**
Account	**crest, address, phone**

Inside a class

IDs	**print student cards. Browser print. Card size is CR80.**
Reports	**the term card for that child**
Codes	**parent codes for the whole class**

Part 4 - Tests and exams

A test in Daymaark is not a new book. You write questions once. You put some of them on a paper. The class sits it. You mark the written ones. The office says yes. Then the parent can see the mark.

Step A. Bank

1. Tap Bank.
2. Tap New bank.
3. Give it a name. Example: JSS 1 Mathematics.
4. Pick the subject and the class.
5. Tap Add question.

Four kinds of question:

- Objective - A B C D. One right answer.
- Multiple select - More than one right answer.
- Subjective - The child writes. A person marks it.
- Comprehension - A passage, then small questions under it.

Build the bank. Use it again next time.

Step B. Set a paper

1. Tap CBT.
2. Tap Set paper.
3. Give it a title.
4. Pick the kind:
   - assessment = a class test
   - exam = the term paper
   - interview = for a new child who wants a place
5. Pick the class.
6. Put how many minutes.
7. Write short instructions.
8. Tick questions from the bank.
9. Save. It is a draft. Nobody can sit a draft.

Step C. Publish

On the paper, tap Publish. Now the class can sit it.

Then you get:

- Link - Like a Google Form. Any phone. No Daymaark account. It looks like /sit/ then a short code.
- Poster - For a class test or exam. Not for an interview. A page with a QR code for the classroom door. Press Poster as many times as you like. Same link.
- Interview - For a new child. They type their name.

- Close - When time is up.

Step D. Sit the paper (borrowed phone)

Open the link, or scan the poster.

1. Type the child's name. That is who they are. No login.
2. Tap start. The clock starts now.
3. Answer. Submit.

Rules:

- One name, one try.
- Close the phone and come back with the same name = carry on.
- Already submitted = cannot start again.

A child with their own login sits from Desk instead.

Step E. Mark and approve

Tap Marking.

The teacher marks written answers. The proprietor or admin taps Approve. Until Approve, the parent cannot see the score.

Reject sends it back.

> The term card only shows papers that were approved. If the card has no marks, nothing has been approved yet.

Part 5 - The parent

The parent creates an account, or signs in.

Welcome page. Tap I am a parent. Type the code the school gave them. On Greenfield that code is ADAEZE01. They can add a phone number.

Today shows the child's name, the attendance strip for the term, today's lessons, and the teacher's one-line notes.

Then

Homework	**work still open**
Results	**approved papers. Open card = the term card. Print from the browser if you want paper.**
Notices	**school notes**
Fees	**what is owed. If fees are due, the term card stays locked.**
Settings	**phone number**

> One child, one sheet. More than one child: tap the name at the top.

Part 6 - The child

The office invites the child's email from the class, under Login.

The child signs in and lands on Desk. They see open tests and exams for their class. They can open their report card. Same fee rule as the parent.

Part 7 - Someone wants a place

No login.

Open /apply/ then the school slug. Greenfield: /apply/greenfield-demo

The guardian fills the form. The office sees it under Apply. They can mark contacted, offered, enrol, or decline. Enrol puts the child on a class list. Then make a parent code as usual.

For an entrance test: publish an interview paper. Give them the Interview link. They type the child's name.

Part 8 - Show Greenfield, in this order

Only if APPLY_RUN19.sql was pasted. Hard-refresh. Sign out between people.

1. Office

Sign in as proprietor.demo@daymaark.app

- Today.
- Classes, open JSS 1A. Adaeze's code is ADAEZE01. Tunde still has fees due.
- People.
- Fees.
- Apply. Kemi is contacted. Yusuf is new.
- Notices.
- CBT. One test is live. The term paper is still a draft.
- Marking. Adaeze's test is waiting.
- Account.

2. Teacher

Sign in as teacher.demo@daymaark.app

- Register. JSS 1A is already marked. Tunde is absent on Mondays. Bola is late on Wednesdays. Tap a name to see the note.
- Lesson. Today's maths, English, science.
- CBT. Open Poster on the class test.

3. Sit the poster

Open a private window. Go to /sit/greenfield-maths-ca

- Type a NEW name. Not Adaeze. She already submitted.
- Start. Close the tab. Same name again. It carries on.
- Submit. Try the same name. It blocks.

4. Parent

Sign in as parent.demo@daymaark.app

- Today. This is Adaeze.
- Homework.
- Results. Open card.
- Fees.

5. Child

Sign in as student.demo@daymaark.app

- Desk. Papers. Report card.

6. Apply

Private window. /apply/greenfield-demo

- Send one form.
- Office sees it under Apply.

7. Print

- Open a child's ID. Print.
- Open a term card. Print.
- Use the browser print box. There is a Back button on the page.

The path to sit with a visitor

Keep this order. Do not skip around.

1. Show the office. New school, or Greenfield proprietor.
2. Teacher marks the register. Posts one lesson.
3. Bank. Set a paper. Publish. Poster.
4. A phone sits the paper with a new name.
5. Marking. Approve.
6. Parent Today. Term card.
7. A child with fees due. The card stays locked. Clear fees. The card opens.
8. Apply form.
9. Print an ID and a term card.

> Do not open /ops on this walk. That page is for the two people who run Daymaark, not for the school.

If something is empty

You did not paste APPLY_RUN19.sql, or you are on an old tab.

Paste the SQL. Hard-refresh. Sign in again.

One line to remember

Office sets the school. Teacher marks the day. Child sits the paper. Office says the mark is true. Parent sees that same day, on one sheet.
